How can we help?

Happy Brands

We are a **manufacturer** who helps brands and people to communicate in a sustainable way with **quality promotional products**.

We are the **first company** in the promotion market to have started caring about environmental sustainability. We made our first pen from **ecological materials** in **1992**.

With over **30 years** of experience in designing and creating genuine **eco-friendly products**, we have come a long way to bring you the best promotional products available today.

Happy
Gifts

Why should we work together?

Our products

- Made from **recycled** or **biodegradable** materials
- Design focuses on **minimizing** weight and waste
- We strive to use only **recycled** materials for packaging
- We are committed to using **eco-friendly technologies** to produce our products

Our brands

- We strive to **minimize resource consumption**
- We work with **environmentally friendly** transport companies
- We use only **green energy**

Sample Kits

SampleKits/8 are paper sample boxes.

Sets hold 8 pens each.

Dimensions **18 x 25 cm**.

Coming soon! Present to you Roll set for pens. Prepared as a sustainable alternative to SampleKits/20 for::

- travel
- business meetings
- advertising agency

Dimensions **45x20 cm**, double string **50 cm** long, **holds 20 pens**.

Made of **organic cotton** and an elastic band that holds the pens firmly.

The material is washable.

We can bring any of your branding ideas to life!

Material

Biodegradable

The employed materials are the real answer to the customer demand for product with low environmental impact, even the pen colors are obtained through the use of biodegradable masterbatches. Made by nature, for nature. Bioplastic is made from materials that come from biological sources such as sugar cane, potato starch or wood cellulose, straw or corn. The Bio-Plastic employed in the production of the biodegradable pens come from renewable sources and go back to the earth through processes of the biodegradation and composing without the release of pollutants. It contains renewable raw materials such as non-genetically modified corn starch. Our pens made from corn starch (except springs and refills) are produced according to the European Union regulations: biodegradation of at least 90% of the material in less than 6 months.

Pet Line

The line of writing articles made with recycled PET coming from the collection of industrial waste and post-consumer products like water and soft drink bottles, food packaging, boxes. Once the differentiated collection is carried out and the material is transported to special sorting centres, this is shredded and regenerated in the form of flakes and granules. Thanks to its characteristics, PET can then be reused to create new products. The recycled PET thus becomes R-PET.

Recycled

Ecoline is a line of pens produced out of recycled drink (beverage) cartons and for that reason the surface of those pens is not completely smooth. For printing on our pens we use ecological, low toxic paints compliant with EU REACH norm. Our first priority is to use recycled materials in order to protect the natural environment. Thanks to us today's waste will become a useful product – an alternative solution for schools, offices and a households. By offering this ecological product to your client you create the image of yourself as an expert in ecology which helps to establish a positive association of your brand. Due to the specific properties and fragments of recycled materials, ecological pens differ in shade and color from the standard Lecce Pen colors.

RABS

The ZEN RE-ABS pen is made from recycled plastic, thus helping to give a second life to products that would otherwise have to be disposed of with which involves additional energy consumption. The use of recycled plastics is part of a broader concept of circular economy, which represents an alternative model characterized by greater sustainability than the traditional linear economy.

- The linear model follows the path of production, use and disposal.
- In a circular economy, resources are used as long as possible, making the most of their value during the entire life. At the end of their use they are recovered and regenerated to give them a second life.

GRS

Material is made from recycled materials containing post-consumer polyester from waste plastic bottles

SafeTouch

SafeTouch Antibacterial™ an ideal solution for public places where the pen is passed on from hand to hand, and where children play. An antibacterial component added to the plastic is active through out the entire life cycle of the pen. After 24h 90% of bacteria are killed. The antibacterial effect has been confirmed and certified. The material is completely safe for the skin

Lecce Pen

Sustainable pens for responsible brands

Lecce pen brand is known worldwide as the first European **sustainable** promotional pen manufacturer with traditions and production expertise since **1953**.

Brand values and philosophy:

- **Sustainability:** dedication to promoting sustainability through the production of eco-friendly pens, ensuring a positive impact on the environment and people.
- **Affordability:** aim to offer affordable promotional solutions, providing value for both - brands and people.
- **Efficiency:** allowing brands to achieve communication in a sustainable way with the least amount of resources, time, effort, and waste.
- **Higher quality:** brands can expect the same level of reliability and quality with each pen they purchase, without significant variations in color or defects.

Re-Pen Push NEW

EcoLine is a line of writing instruments made in a special material coming from the recycling of beverage cartons. Beverage cartons are in fact composed of several layers: **cellulose, polyethylene and aluminum**. After a first processing for the recovery of cellulose, the fraction of polyethylene and aluminum is further processed to generate a **new second raw material**. This recycled material has a very particular **aesthetic aspect** (thanks to the presence of aluminum together with the plastic component) which distinguishes it from any other on the market.

Discover the best outlet offers

Guaranteed favourable prices

enote

Enote Classic notebook at a **very good price!**
Discover the collection of **notebooks** and advertising **planners**
in very business colors, with lots of **functional details**.

Undated planners, i.e. planners with space to write the date on each page.
The undated planner is a great and versatile solution. Unlike traditional is repeated.
You don't have to skip pages, pages or even entire holiday weeks,
because each subsequent page is exactly the date you need.

Bag & Fly promotional **premium** backpacks.

A well-designed backpack can serve as **a mobile advertisement**, providing long-term value for your company. The **BAG & FLY** collection uses a combination of durable **waterproof materials** with protection against rain and splashes, specially selected and **repeatedly tested in various** conditions in terms of product durability.

Depending on the model, the backpacks have many convenient and necessary features:

- **Ergonomic braces and a ventilated orthopaedic** back with optimum load distribution will prevent back and shoulder fatigue.
- **The smart „anti-theft” pocket** on the back of the backpack is designed to be attached to the pull-out handle of a suitcase and will free your hands.
- **Special RFID pocket** with protection system against unauthorised reading of personal data.

Spark

Fits **15.6" laptop**, **USB** port for charging, cardboard label with Bag & Fly logo, Inside the backpack is a **non-woven storage bag**. **Backpack load limit: 7 kg**. Backpack designed for business use.
